Join us for the upcoming Webinar: The Road to Interoperable IP Solutions

The security marketplace has gone through a transformation to network-based products. Networked-based solutions bring a host of advanced capabilities to users. This Webinar, sponsored by the Physical Security Interoperability Alliance, outlines the inherent benefits of leveraging interoperable network-based technologies in security applications. Join speakers Ray Bernard, PSP, CHS-III, principal consultant, Ray Bernard Consulting Services (RBCS); Bill Jacobs, Vice President of Access Control, Next Level Security Systems; and Fredrik Wallberg, Marketing Manager, America, Milestone Systems, for this informative and interactive Webinar.
